(3) Loan Summaries

CFO management confirmed that FSA does not have any existing reports or responsive documents for this portion of your request. To attempt to gather the information, FSA would have to *create* rather than *produce* records, something that FOIA does not require. Moreover, such a search would require re-directing contractor staff from core NSLDS duties in order to write computer code to extract individual pieces of information and use software to combine that discreet information. These searches would also degrade the functioning of the NSLDS system. Cumulatively, therefore, this request would be unduly burdensome and interfere with the CFO’s and FSA’s business and IT operations.
